

## UROLOGY

The Clinic of Urology and Paediatric Urology at Quickcare Hospitals offers comprehensive and modern treatment to all urological patients. State-of-the-art technique and modern equipment allow accurate diagnosis and effective treatment to male and female patients and children as well. The urological treatment spectrum includes disorders of kidneys, ureters, bladder, prostate, urethra and the male genital organs.

Our services include the diagnosis, treatment and management of the following urological conditions:

- All type of [prostate](#) problems including cancer
- [Urinary tract infection](#)
- [Kidney and bladder stones](#)
- All diseases of scrotum like varicocele, hydrocele, spermatocele etc. including cancer of the testicle
- Stricture of urethra
- [Infertility](#)
- Inguinal hernias
- [Erectile dysfunction](#)
- Peyronie disease
- Phimosis
- [Bladder and kidney cancer](#)
- [Overactive bladder](#)

for children:

- Enuresis
